1. A comparison of a flat and angled breast board for use in radiotherapy of the breast  
   Michael Aldred (Newcastle-upon-Tyne)

2. Quantitative image quality assessment as part of a routine Quality Assurance program  
   Michael Barnard (Oxford)

3. Analysis of UVB phototherapy quality assurance methodology and dosimetry  
   Patrick Begley (Northampton)

4. Optimization of pelvis examinations in a DR rooms by increasing focus to skin distance  
   Paul Charnock (Liverpool)

5. Alignment of plantar pressure data with 3D foot placement data  
   Helen Davies (Birmingham)

6. Investigation into dose rates from beta radiation sources  
   Katharine Kenny (Oxford)

7. A dosimetric comparison of CyberKnife and Gamma Knife for solitary intracranial lesions.  
   Alexander Martin (London)

8. Trainee participation in CyberKnife post-installation, commissioning and verification  
   Rollo Moore (London)

9. An investigation into recombination losses in six different thimble ionisation chambers at high dose rates  
   Kurian Oommen (Glasgow)

10. Dose rate study of single crystal CVD diamond detectors for the dosimetry of radiotherapy photon beams  
    Maria Antonietta Piliero (Swansea)

11. Quality Assurance of Neonatal Phototherapy Units  
    Dean Talboys (Reading)

12. Comparison of four regional CDMAM test phantoms  
    Tracey Thatcher (Wolverhampton)
