## Final Student Session

### Final Student Session

**Saturday, March 7, 14:00–15:30, Studio 2015**

The best speakers from each of the four student sessions from the last two days will present their work in the Final Student Session. This year's finalists are as follows:

- Dynamic contrast enhanced MRI kinetic modelling analysis of carotid plaque neovascularisation is moderately correlated with quantitative enhancement intensity by ultrasound contrast harmony imaging - W. Abutaleb; Cambridge/UK
- Reproducibility of a novel semi-automated software programme for Pre-TAVR CT assessment - K. Rohan; Belfast/UK
- Mammographic screening and detection of breast arterial calcification as an independent predictor of coronary atherosclerotic disease in a single ethnic cohort of African American women - J.H. Nunez; Charleston, SC/US
- Teaching cross-sectional imaging to medical students using Apple iBooks: a novel educational resource - M. Sia; London/UK
